

CITY FACTS!

According to the EPA just one hour of gas-powered leaf blower use is equivalent to **driving 1,100 miles!**

In 2021 the City purchased an electric leaf blower to cut down on the pollution. Breathe easy!

CHANGING CLIMATE

in White Salmon

PREPARED BY THE
**WHITE SALMON
CITY LAB BOARD**

RESPONDING TO CRISIS

In March 2021 the City of White Salmon declared a climate crisis. The declaration recognizes that from our city to our planet, we are facing an unprecedented change in global temperature. Our changing climate is causing increasingly damaging effects on our forests, health, economies, and livelihoods.

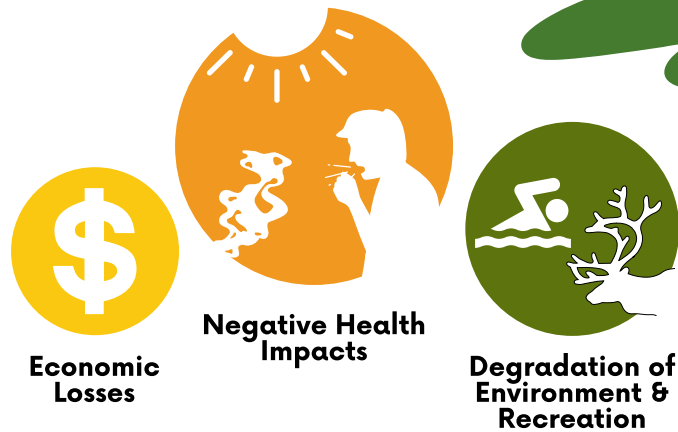

EFFECTS WE'RE ALREADY FACING

ATTEND THE CITYLAB BOARD MEETINGS!

The declaration also tasks the City with working alongside our residents to identify and provide support to the most fragile parts of our community.

IMPACTS ON OUR COMMUNITY

Following the declaration, the City created a group called the CityLab Board. The purpose of the group is to determine how White Salmon should respond to the climate crisis and its effects on our way of life.

4th Tuesday of every month
6PM via Zoom Teleconference

This Board currently has 5 members, but all residents of White Salmon with interest are invited to apply to join. Otherwise meetings are held on the last Tuesday of every month and are open to the public to attend via Zoom
