Application for Payment No. 3 includes materials submittals, weekly virtual meetings with the Contractors, Engineer, and Owner, acquisition of materials for and work on the 16-Inch Class 350 Ductile Iron Water Line, and conduit installation for Additive Alternate 1 (parallel with the new water transmission main), and Additive Alternate 2 (near the Buck Creek WTP). Quantities of materials on hand from previous Applications for Payment have been adjusted to reflect work completed during this pay period, and the cost of the adjusted materials on hand has been deducted from the bid items for this period. Anderson Perry staff has observed the site work and materials on-hand and were satisfied with the progress of work and requested payment amount.

Minor changes have been made to the cover page of this Application for Payment from previous payments to include funding agency. Additionally, tax on retainage was not included in Application for Payments 1 and 2, that tax is included on this Application for Payment.

Engineering services provided for the Application for Payment No. 3 period included review of Contractor materials submittals and AIS certification review for materials on hand, review of updated environmental compliance documentation, weekly virtual meetings with the Contractor (scheduled every Tuesday at 2:00 p.m.), and daily construction observation.

Please contact me if you have any questions or comments on this invoice or the project itself.
