Executive Summary

This report assesses White Salmon’s housing needs from 2023 through 2043. The primary goals of the housing needs analysis are to (1) assess the amount of land needed to accommodate the future housing needs within the White Salmon city limits, (2) assess the existing residential land supply within the city to determine if it is adequate to meet that need, (3) fulfill state planning requirements for adequate residential land, and (4) lay the groundwork for a Housing Action Plan (a subsequent document) that will identify actions to be taken by the City of White Salmon to meet the identified needs.

Over the last two decades, White Salmon has seen a dramatic rise in home prices, along with a corresponding decrease in available homes and homesites for sale. A similar, though not as dramatic, rise has also occurred in home rental prices. Housing affordability and availability is a challenge throughout the Columbia Gorge, but particularly so in White Salmon, as it is seen as an increasingly attractive second home, retirement, and even primary home location. This trend has accelerated through the COVID-19 pandemic, with increasing numbers of workers able to work remotely from home. It appears that the trend is likely to remain a factor drawing new residents to the city, and putting upward pressure on home prices. The new residents are by definition those who can afford the more expensive homes.

As of May 2023, the median listing price of White Salmon homes was \$869,000¹. Median rents were \$1,900, an increase of \$847 per month over a one-year period.² According to listing sources, there were just six homes for sale within the White Salmon city limits, with an average listing price of \$917,500, and eight rental properties with an average monthly rental of \$2,418.³ Within the larger White Salmon market area, there were just 14 homes, listed at an average price of \$1.22 million; the lowest priced home was \$550,000.⁴ Zillow.com estimates the monthly payment on this home to be \$3,280.00 per month. At a typical 28% of gross monthly earnings, even this home would require an annual income of \$140,500 – far above the area median household income of \$65,781 (2020 data).⁵

Clearly these homes cannot meet the critical needs for workforce housing, for housing suitable for most families, or for anyone whose annual income is even twice the median household income. If White Salmon wishes to become more diverse and equitable in its housing availability, it must understand these needs and how to address them.

⁵ DataUSA.io

The key findings of this analysis of housing needs (Volume I) are:

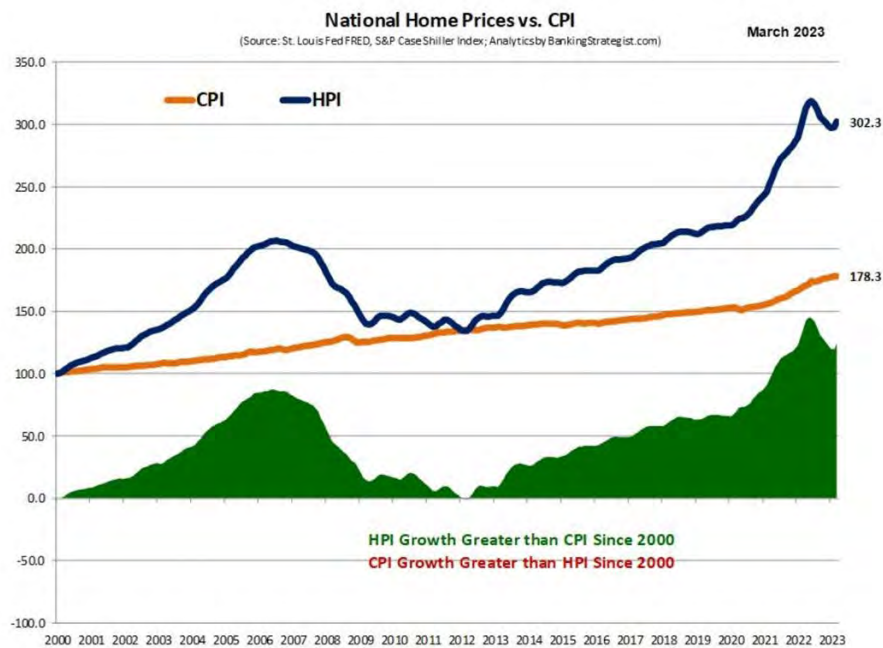

- White Salmon has been growing relatively slowly – about 0.7% per year since 2010 – although growth has accelerated somewhat since 2020, to about 1.1% per year.
- Without major new drivers of population growth (e.g. major new employers), and without a concurrent change in numbers of available homes, population growth is likely to remain slow. At a continued rate of 0.7%, the population would grow by 408 persons by 2043, or approximately 169 homes at an average household of 2.41 residents. If the higher rate of 1.1% growth were sustained, the demand would be 667 persons, or 277 homes. This equates to 14 homes per year on average within the city limits. The 2020 Urbanization Study by FCS Consultants estimates a significantly higher demand for the “White Salmon area” (city limits plus county area) of 1,019 homes, or 51 homes per year.
- Population growth is not the only factor in unmet housing needs, as there is growing displacement of existing residents and employees who are increasingly priced out of this market. This is particularly true for young residents. White Salmon is becoming “a tale of two cities” – those who can afford to live there, and those who do much of the work, but must commute in from other locales.
- Additional housing supply can address the upward pressure on housing prices – but a *different* housing supply is also needed, with fewer single-family detached homes, and more multi-family, attached, and so-called “missing middle” homes (duplexes, accessory units, cottage courts, et al). There is also an urgent need to lower the cost of home construction, permitting and land values.
- More fundamentally, although housing supply is certainly contributing to higher prices, the desirability of White Salmon as a relocation community is likely to continue to put upward pressure on market-rate home prices, even with significantly increased supply. This is particularly true with the rise in work-from-home trends in the wake of the COVID-19 pandemic, and the attraction of White Salmon for former residents of (and even commuters to) Portland and Vancouver. This suggests that other strategies may be needed to establish and maintain permanent workforce housing (as discussed in Volume II).
- While there may be adequate land supply to accommodate the projected growth in housing, particularly if future units are higher-density, actions are still needed to make these sites suitable for home development. (These actions are discussed in Volume II.)

Introduction

White Salmon, Washington, is a beautiful small town (population 2,727) located in the spectacular Columbia Gorge, approximately 70 miles east of Portland, Oregon and Vancouver, Washington. The city is an attractive vacation and retirement destination, and it is increasingly desirable as a home for commuters. As a result, in recent years housing demand has surged, supply has declined, and prices have increased significantly, causing displacement and hardship for many residents.

This is a challenge not only for White Salmon, but for cities across the USA. As the chart below indicates, home prices have far outstripped the pace of inflation, even in the recent period of higher inflation. This trend is even more dramatic in the Pacific Northwest.

Table 1. National Home Prices Relative to Inflation

Source: Bankingstrategist.com, from data by St. Louis Fed and Case Shiller Index.

In response, the City of White Salmon is developing a Housing Needs Analysis (HNA) and Housing Action Plan (HAP). The two documents will address the housing challenges the City faces, and exploit opportunities to promote more housing diversity that is more affordable to more residents of the community, essentially making more housing available across all income segments. The City received a grant from the Washington Department of Commerce to complete these two reports.

This plan builds on the findings that were part of the 2020 White Salmon Urbanization Study and the 2021 White Salmon Comprehensive Plan.

The goals of this analysis are to:

- Quantify existing and projected housing needs for all income levels, with documentation of housing and household characteristics.
- Analyze population and employment trends, with reasonable projections.
- Review and evaluate the current housing element adopted pursuant to RCW 36.70A.070, including an evaluation of success in attaining planned housing types and units, achievement of goals and policies, and implementation of the schedule of programs and actions.
- Provide an overview of the housing landscape and planning environment.
- Help the City plan for additional housing through 2040 by providing key data and analysis on the current housing inventory and future housing need in White Salmon.

Volume II, the Housing Action Plan, will:

- Assess current regulations and their impacts on housing availability.
- Identify strategies that address emerging development issues, and that will promote housing development of the quantity and type necessary to meet White Salmon's projected housing needs.
- Recommend actions that will encourage more housing development at all income levels, to accommodate future and current residents.

To develop this two-volume report, the City assessed housing needs, reviewed housing policies, and engaged the public. The results have led to three key housing objectives that are addressed in the report:

- Preserve affordable housing and prevent or mitigate displacement.
- Increase market-rate and affordable housing supply throughout White Salmon, but focus on areas that support multifamily and "missing-middle" housing types.
- Increase housing options and housing choice.

Purpose

Through surveys and engagement events held during the creation of the White Salmon 2040 plan and urbanization study, the community expressed interest in additional opportunities for housing that is affordable. Comments such as “I would love to see more parks, public transportation and housing options”⁶ were a common theme.

To remain a vibrant community that meets the housing needs of a broad cross section of a community, a city should periodically update policies and regulations to ensure availability of housing. Creating both a housing needs analysis and a housing action plan will help further the goals and help guide the way to implement the findings from the Urbanization Study and the White Salmon 2040 plan.

The data discussed in this assessment can help guide the creation of policy to address housing shortages and gaps in types of housing available.

Affordable Housing Versus Housing That is Affordable

Throughout this analysis, the terms affordable housing and housing that is affordable or attainable are used. These sound like interchangeable terms, but each has a distinct meaning. Affordable housing often has a public funding component, where either a public agency owns the properties, or provides subsidies, or provides other ongoing support.

“Housing that is affordable,” or “attainable,” is housing that a majority of residents in the community can quality to purchase or afford to rent without being considered “rent-burdened.” There will be a further discussion of rent burden later in this analysis.

So-called “Missing Middle Housing” includes duplexes, rowhomes, accessory dwellings, and small apartment buildings. Image courtesy Opticos Design.

Companion Documents

In 2020, the City of White Salmon contracted with consultants FCS Group and WSP USA to complete an updated Urbanization Study for the city. According to the introduction, the study “entails a countywide assessment of buildable lands, infrastructure, economic opportunities, and housing needs, and identifies potential strategies to address future urbanization needs.”⁷

The Buildable Lands Inventory included with the study identified 117.5 acres of buildable land with a dwelling capacity of 479 units. This is significantly higher than the 20-year projection of the maximum demand of 277 homes (14 homes per year), based upon a population increase of 1.1% per year (667 persons, 277 homes at 2.41 persons per home).

The Urbanization Study also noted that 182 acres of land would be needed to accommodate the housing demand, a net increase of 76.3 acres over the current 105.7 acres of vacant land. However, these values assume that the area within the city limits will capture a greater percentage of new housing in the greater urban region than has been the case historically, and that single-family detached will continue to dominate. If the City determines that higher-density housing is appropriate, then the demand for additional land will be lower. As noted, this will require additional actions.

In addition to the Urbanization Study, the Appendix included a Public Outreach Summary that reported on specific buildable sites identified by stakeholders. That information is reported in the section on buildable lands.

The Urbanization Study also included an assessment of current housing stock. As reported in more detail in the section on “Existing Housing Stock,” there were 1,396 dwelling units as of 2018, of which 69% were single-family detached, with the remaining 31% as rowhomes, apartments, duplexes, and other types.

In July 2021, the City adopted White Salmon 2040, an update to the City’s comprehensive plan. The White Salmon 2040 plan was written to ensure that White Salmon remains “...an innovate, diverse and thriving village.”⁸

Both plans contain detailed demographic information through 2019. This report uses data from the Urbanization Study and the White Salmon 2040 plan, and updates demographic information as needed to include available 2021 and 2022 data.

⁷ White Salmon Urbanization Study, page 1, adopted November 11, 2020

⁸ City of White Salmon 2040 Comprehensive Plan, page 1, adopted July 2021

Population Trends

The population of White Salmon is growing steadily, although growth has been relatively slow. Data from the Washington State Office of Financial Management’s Small Areas Estimate Program from April 2022 shows the average annual growth between 2000 and the 2022 estimate is approximately 0.7%, well below the State’s overall population growth rate of 1.5%.⁹ However, since the 2020 Census, population growth has increased somewhat, with the average annual population growth being 1.1%, still well below the state’s overall growth rate of 2.4% for the same period.

Population in Klickitat County has also lagged behind the state’s overall growth, with the county’s population increasing at a rate of 0.9% between 2000 and 2022 and 1.7% between 2010 and 2022.

At a continued rate of 0.7%, the population would grow by 408 persons by 2043, or approximately 169 homes at an average household of 2.41 residents. If the higher rate of 1.1% growth were sustained, the demand would be 667 persons, or 277 homes. This equates to 14 homes per year on average.

Table 2. Historic Population Trends 2000-2022

Population*	2000**	2010**	2018	2019	2020**	2021	2022	Growth

Economic Trends

Economic development and changes to employment can affect changes to population and the demand for housing. In turn, the availability or shortage of housing can affect economic development, both in quantity and in distribution across income groups. This report utilizes data from both the Urbanization Study and the White Salmon 2040 plan, as well as the most current American Community Survey 5-year data.

Table 3. White Salmon Employment Trends 2010-2017

Sector	2010	2017	Change
Agriculture and Forestry	-	14	14
Industrial	104	296	192
Retail	62	78	16
Services	402	340	(62)
Government/Other	44	336	292
Total	612	1,064	452

Source: White Salmon Urbanization Study

Table 1 shows an increase in job sectors between 2010 and 2017 but does not account for the substantial increase in Government/other jobs. The significant increase in industrial jobs is likely attributable to the expansion of Insitu, a manufacturer of commercial/military drones and associated companies that support Insitu.

More detailed data is available using American Community Survey (ACS) five-year data using data obtained and tabulated by the US Census Bureau through 2021. Although the data vary slightly, both sources show employment in White Salmon is growing, and growing faster than the population within the city limits. This suggests that commuting rates to jobs in White Salmon are increasing.

There is a perception that White Salmon has an excess of positions that would be considered service industry jobs, such as restaurant workers and hotel employees. Perhaps surprisingly however, American Community Survey data reveals only 10.3% of jobs are in this category (Table 4).

Indeed, service occupations are 5.5% lower than Washington overall, and about 6% lower than the United States average. Also perhaps surprising, the retail industry is also notably under-represented in White Salmon compared to Washington and the United States overall.

Although White Salmon is known for being a recreation hub and a growing food, beer and wine scene, the industry category that includes arts, entertainment, recreation, accommodation and food services represents only 3.7% of workers by industry, well below the Washington figure of 8.7% and 9.1% for the entire United States. It is possible service industry workers are commuting to other jobs outside of White Salmon, but these types of positions are apparently not well represented within city limits.

Other industries are over-represented in White Salmon, including agriculture, forestry, mining, manufacturing, wholesale trade, and self-employment. These jobs are likely the result of orchards as well as a growing wine industry and a strong timber industry in the region. With the growth of Insitu, spinoff or supporting manufacturers have started businesses in the area and likely at least some of these workers are in White Salmon.

Although typically better-paying occupations – management, business, science and arts occupations – are over-represented in White Salmon, the average wage for workers in White Salmon still lags behind Washington and the United States as a whole.

Source: American Community Survey ACS 5-Year Estimate Data Profiles through 202

Rates of Commuting

Less than 10% of all employed persons both live and work within the city limits of White Salmon. The overwhelming majority of those working within White Salmon live outside city limits, and commute to the city.

It is not uncommon to hear of some residents commuting long distances for work because they cannot find housing that is affordable within or adjacent to White Salmon. This is supported by the data in Figure 1.

Figure 1. Distance/Direction Analysis from the US Census On the Map Tool

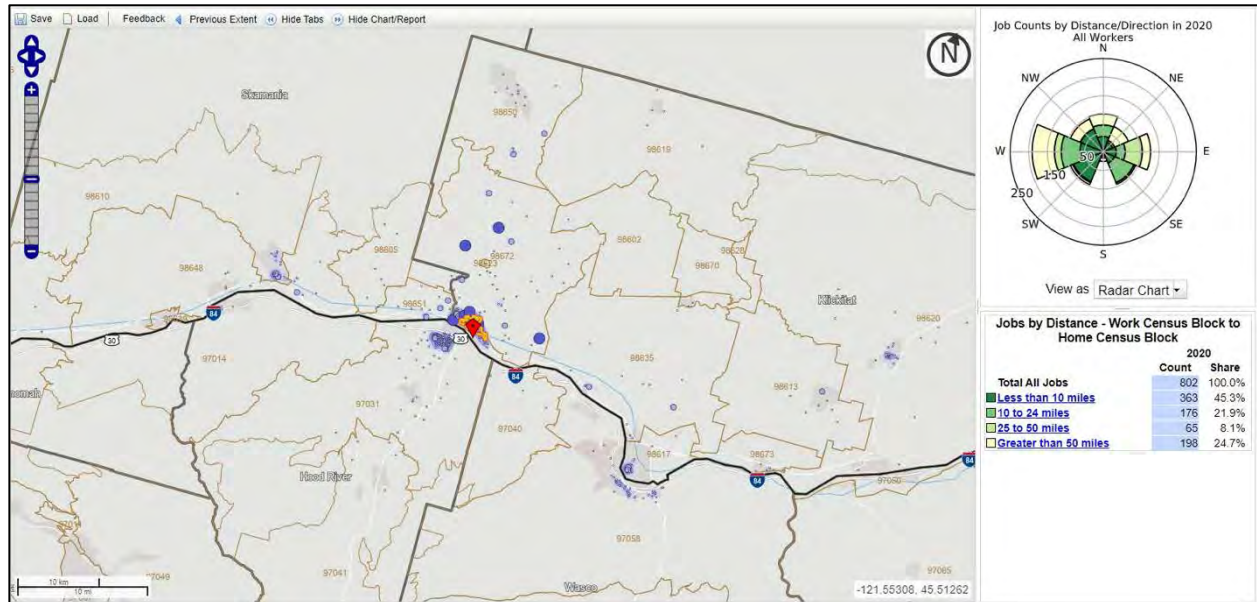

Source: US Census On the Map Distance/Direction Analysis for White Salmon

Data from the US Census “On the Map” tool demonstrates this trend. The analysis shows 721 workers who commute to White Salmon, while 769 White Salmon residents commute to other cities. Only 81 live and work within White Salmon, according to the data.

The distance commuted can also be significant, as shown in Figure 2. Almost 25% of White Salmon commuters travel more than 50 miles, while 30% travel between 10 and 50 miles.

As show in Table 5, Hood River is the biggest work destination for residents of White Salmon, with White Salmon itself being second, and Portland and Bingen nearly tied for third place.

Figure 2. Commute by Distance Analysis from the US Census On the Map Tool

Source: US Census On the Map Distance/Direction Analysis for White Salmon

There are uncertainties in the data, however. Some who work from home may be counted as working at an employer located far from White Salmon, or they may commute to a job in another city several times per week or month, with the bulk of work being performed at their home in White Salmon. This trend has accelerated with the COVID-19 pandemic, and it seems to be continuing.

Table 5. Jobs Counts by Places Where Workers Travel to for Employment - All Jobs

2020		
	Count	Share
Hood River city, OR	95	11.2%
White Salmon city, WA	81	9.5%
Portland city, OR	54	6.4%
Bingen city, WA	50	5.9%
The Dalles city, OR	41	4.8%
Seattle city, WA	22	2.6%
Vancouver city, WA	20	2.4%
Beaverton city, OR	12	1.4%
Olympia city, WA	10	1.2%
Stevenson city, WA	10	1.2%
All Other Locations	455	53.5%

Source: U.S. Census Bureau, OnTheMap Application and LEHD Origin-Destination Employment Statistics (Beginning of Quarter Employment, 2nd Quarter of 2002-2020).

A further uncertainty in the data is that 455 residents commute to places “not identified.” This represents over half of all White Salmon workers.

Nonetheless, it can be seen that long commuting distances are common. In the case of those commuting *to* White Salmon, the high cost of housing is undoubtedly a major contributor. In the case of those commuting *from* White Salmon, the desirability of the community as a home while working in a larger employment center is also likely a major factor. Some 14% of the identified employment locations are major urban areas like Portland, Seattle or Olympia.

Income

Income in Washington is higher than US income (\$82,400 versus \$69,021 median annual income). However, the ACS Five-year income estimate shows that White Salmon lags behind Washington and the United States overall in median income (\$62,953 annually) A similar pattern holds for household income (all household members regardless of relationship), family income (members are related) and nonfamily income (people live together or alone but are not related).

Table 7. Income in US, Washington and White Salmon

	United States	Washington	White Salmon
Median household income	69,021	82,400	62,953
Mean household income	97,196	111,431	80,944
Median family income	85,028	98,691	78,814
Mean family income	114,099	129,229	102,611
Median nonfamily income	41,394	51,895	40,625
Mean nonfamily income	61,050	72,738	49,471
Per capita income	37,638	43,817	34,176

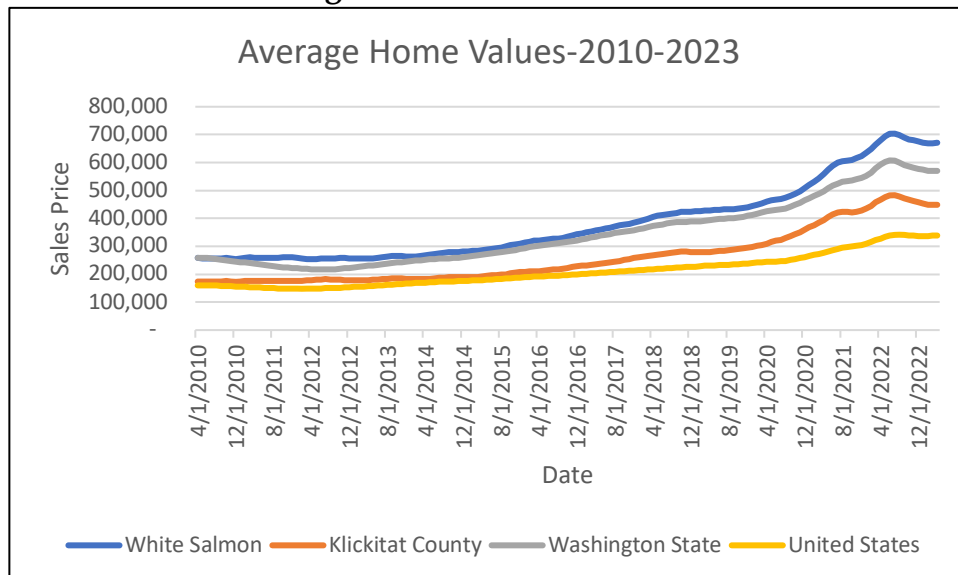

Source: ACS Five-Year Estimated Data Profiles for White Salmon (through 2021)

This is somewhat counter-intuitive, since White Salmon is under-represented when it comes to jobs in the service and retail sectors, and over-represented in what are often considered higher paying sectors. This may reflect a higher number of retirees whose annual income is fixed, but whose net worth – and home value – may still be high.

In any case, it can readily be seen that there is an enormous gap between median household income and median home prices. Using the typical formula of 28% of gross income for housing costs, a person earning the median of \$62,953 could afford a rental of \$1,468 per month, or a home price of approximately \$200,000. This is far below what is available.

House Prices

Table 8. Average Estimated Home Values 2010-2023

Source: City, County, State and US data from Zillow Research

Existing Housing Stock

The 2020 White Salmon Urbanization Study reported a total of 1,396 housing units in the city as of 2018, up from 816 in 1990. That represents an increase of 580 homes. At the same, time average household size dropped from 2.43 to 2.2.

Paradoxically, this suggests a population growth higher than reported. If the additional 580 homes brought with them 2.2 residents, that would be a population growth of 1,276, considerably higher than the reported population growth of 604 persons during the same period (approximately 1.0% per year). It seems very likely that a significant portion of the additional housing stock represents second homes, which do not contribute to local housing needs.

Table 9. Number of White Salmon Dwelling Units 1990-2018

	1990	2000	2010	2018
Households	763	887	889	1,107
Avg. HH Size	2.43	2.46	2.23	2.2
Dwelling units	816	949	1,087	1,396

Source: U.S. Census, and American Community Survey 2013-2018 estimates.

The urbanization study also listed the dwelling units by type, demonstrating that single-family detached homes are overwhelmingly the most common type (69%). Apartments, rowhomes and multiplexes are next in frequency at only 20%. The last category is mobile home or other, at 11%.

Since single-family homes are generally the most expensive housing unit, the need for more affordable housing translates into a need for more attached and multiplex units.

Table 10. White Salmon Dwelling Units by Type 2010-2018

	2000		2018	
	#	%	#	%
Single Family Detached	606	64%	968	69%
Townhomes/Plexes/Apts	211	22%	275	20%
Mobile Home/Other	131	14%	153	11%
Total Housing Units	948	100%	1,396	100%

Source: U.S. Census, and American Community Survey estimates.

The urbanization study also provided some data about the breakdown of rowhouses (153) versus multi-family (128) and mobile homes or “other” (170). This latter number was prior to the removal of the Washington Street mobile home park in 2020. Clearly there is room to add rowhomes and multi-family, and to consider adding manufactured or mobile homes as well as other innovative forms of affordable housing (as will be discussed in Volume II).

Table 11. White Salmon Dwelling Units by Type 2010-2018

	Klickitat County	White Salmon	% in White Salmon
Single Family Detached	7,600	889	12%
Townhouses / Plexes	748	153	20%
Multi Family (5+ units)	387	128	33%
Mobile Homes/other	1,566	170	11%
Total	10,301	1,340	13%

Change in Dwellings	Klickitat County	White Salmon	% in White Salmon
2000 to 2018	1,668	448	27%

Source: U.S. Census, and American Community Survey estimates.

Housing Inventory and Market Trends

According to data from Realtor.com, as of May 2023, the median listing price of White Salmon homes was \$869,000¹⁰. According to listing sources, there were just six homes for sale within the White Salmon city limits, with an average listing price of \$917,500. Within the larger White Salmon market area, including Bingen and Klickitat County, there were just 14 homes for sale, listed at an average price of \$1.22 million. The lowest priced home was \$550,000.¹¹ Zillow.com estimates the monthly payment on this home to be \$3,280.00 per month. At a typical 28% of gross monthly earnings, even this home would require an annual income of \$140,500 – far above the area median household income of \$62,953 (2020 data).¹²

Area rentals are only moderately more affordable. Area listing services show only eight rental properties listed, with an average monthly rental of \$2,418.¹³ Median rents were \$1,900, an increase of \$847 per month over a one-year period.¹⁴ That is also substantially above the affordable rental rate for a median household income of \$62,953, which is just \$1,468 per month.

The one-year history of home sales is also meager. According to RMLS data, only 8 homes have sold, for an average price of \$506,250.¹⁵ Eight pending sales are also under contract for an average price of \$682,750.¹⁶

As noted previously, all of these prices are well above what is affordable for those making the median annual household income in White Salmon.

Buildable Lands

The White Salmon Urbanization Study identified 117.5 acres of buildable land, with a dwelling capacity of 479 units. The Appendix included a Public Outreach Summary that reported on specific buildable sites identified by stakeholders. Following are the properties identified.

West		
Community	Site Location and Description	Notes
White Salmon	Parcel east of new Hood River Bridge bridgehead	Could include a business cluster and park component. Need to think about how to create a new access road from the bridge to Main Avenue.
White Salmon	Rhine Village	Has space for additional multifamily apartment buildings.
White Salmon	Gaps or “broken teeth” along Jewett Blvd in downtown White Salmon	Two- to three-floor buildings with commercial on ground floor and apartments above, and/or 50- to 120-room hotel.
White Salmon	Hospital Hill	Proposed subdivision with 60 to 70 single-family home lots.
White Salmon	Heritage Plaza	Mixed-use business cluster.
White Salmon	Behind New Beginnings Church on Oak Street	
White Salmon	South side of Jewett Blvd east of Eighth Street	Townhomes - a mix of market rate and affordable.
White Salmon	Tillotson Road area	Single-family dwellings.
White Salmon	Unidentified 7-acre vacant parcel within city limits	Single-family dwellings on 6,000-square-foot lots.
White Salmon	End of Pole Yard Road, north and west of Skyline Drive	Ideal for townhomes or apartments. Push the buildings against the bank - challenge is setback from Jewett Creek.
White Salmon	Washington Street trailer court	Already has sewer - capacity might be an issue.
White Salmon	4-acre parcel south of funeral home on Main Avenue	Annexed into the city a while back. Owner brought a development proposal to the City (high-density townhomes with some single-family dwellings) but the project drew opposition and did not move forward.
White Salmon	Property on north side of Waubish Street in west end of White Salmon	
White Salmon	40 acres on Lincoln Street - the “Stevenson” property	

Conclusion

Although an adequate inventory of buildable lands appears to exist to meet the projected demand for White Salmon housing (277 housing units over 20 years, or an average of 14 homes per year, with average household size of 2.41, total population growth of 667 persons), this Housing Needs Analysis identifies two critical and unmet needs. The first is to develop more appropriate housing types, better able to meet the diversity of needs and incomes of the entire population of residents and employees. This will necessarily require a more diverse housing stock, including more affordable types (attached homes, apartments, “missing middle,” etc). It may also include other innovative types (as discussed further in Volume II).

The second critical and unmet need is to make these sites, and potentially others as needed, suitable for homebuilding. Doing so will likely require a number of actions, including regulatory changes, incentives, disincentives, funding sources, infrastructure construction, and additional creative actions on the part of the City and its partners. It will also require the support of the community in making any such changes, and the confidence that what will be built will be worthy of support.

White Salmon, like many cities and towns, is facing growing pressure to add housing supply. But this is far from the only need, or the only responsibility for a democratic society. No less important is to build our homes, neighborhoods and other structures in an enduring way that serves the public interest. In such a democracy, the citizens have a right to participate in the regulation of what may be built. It is far more appropriate to do this in a proactive way, and one that is supported by the community and the potential neighbors, than to force approvals of undesired structures on the one hand, or to see critical needs for suitable housing go unmet on the other.

Meticulously kept 3 bedroom 2.5 bathroom home perched on top of the hill on the north side of Spring Street. Gorgeous views of the hills and White Salmon River Valley from every room! Open floor plan with beautiful hardwood flooring, windows and doors fully wrapped with wood trim, plus lovely picture windows and sliding glass door opening to back deck. Kitchen features large island with eating bar, granite countertops, stainless steel appliances, and pantry. Upstairs hosts the spacious primary suite with walk-in closet, two large guest bedrooms, second full bathroom, separate office, and laundry room. Outside you have a privacy fence, covered patio, detached garage, low-maintenance landscaping, and a spot for your RV! Buyer has option to have a turn-key home with the furnishings negotiable. Continue current use as a profitable AirBnB or purchase as a primary residence.

Beautiful 3 acres within city limits of White Salmon. Older home is situated in the NE corner of the acreage. Property is zoned R1 - buyer to do due diligence regarding development possibilities. Property is sloped but with some thinning it could have beautiful, unobstructed views of the Columbia River to the east.
