Re: Statement regarding slopes on Cherry Hill Estates

Erika,

The purpose of this statement is to verify the existence of steep slope critical areas being defined by slopes exceeding 40 percent on the Cherry Hill Estates project. The topographic detail being used for design was derived by using the State of Washington Lidar data, wasco-B, data blocks. This data was field checked in December 2020 with a grid of ground shots for quality control. The majority of the property is well under the 40 percent slope, however the portion on the westerly edge of the southerly leg of the property does have slope at or exceeding the 40 percent slope.

Please reach out if you have questions.

A handwritten signature in black ink, appearing to read 'Erik M. Carlson', is written over a light blue horizontal line.
