

CITY OF WHITE SALMON – WATER CURTAILMENT NOTICE

Date: June 24, 2026

The City of White Salmon will be performing a critical water system tie-in on **Wednesday, June 24, 2026, from 8:00 AM to 6:00 PM**, as part of the Transmission Main Replacement Project.

To ensure adequate water supply and system reliability during this work, **all water customers throughout the City of White Salmon, the City of Bingen, and surrounding areas connected to the City of White Salmon water system** are requested to significantly reduce water use during the tie-in operation.

Please avoid the following activities between 8:00 AM and 6:00 PM on June 24:

- Lawn and landscape irrigation
- Washing vehicles
- Filling pools, hot tubs, or water features
- Power washing
- Any other non-essential water use

Maintaining adequate system pressure is critical during this work. Excessive water use could contribute to low-pressure conditions in portions of the distribution system. If system pressure falls below state regulatory requirements, the City may be required to issue a **Boil Water Advisory** until water quality testing confirms the system remains safe for consumption.

Customers may experience temporary fluctuations in water pressure during the tie-in operation. Every effort will be made to minimize impacts and complete the work as quickly as possible.

This project is a critical investment in the City's water infrastructure and long-term reliability. We appreciate your cooperation and assistance in helping us avoid service disruptions and complete this important work safely.

For questions, please contact White Salmon City Hall at **(509) 493-1133**.
